

Paraskevi Fragkou is an Internal Medicine Consultant with an interest in infectious diseases and extensive clinical and research experience both in Greece and abroad. From 2021 to 2024, she served as a Consultant at the 1st Department of Critical Care and Pulmonary Services at "Evangelismos" General Hospital (National and Kapodistrian University of Athens - NKUA), actively participating in the care of critically ill patients.

She was the top graduate of the Medical School of the University of Patras, and she completed her postgraduate studies (M.Sc.) in Internal Medicine at the University of Edinburgh with distinction. She holds a Ph.D. degree from the Medical School of NKUA (with honors), with her dissertation focusing on HIV infection, which was awarded as the best clinical Research Project in 2019 by the Hellenic Society for the Study and Control of AIDS.

She has trained in leading hospitals in Greece and the United Kingdom, including the Royal Sussex County Hospital, Croydon University Hospital, and the "Attikon" University Hospital. Her scientific interests involve viral respiratory infections and multidrug-resistant infections, with notable contributions to European guidelines (COVID-19, Gram-negative pathogens, renal dysfunction). Her research work includes over 60 publications in reputable international peer reviewed journals, with more than 3,100 citations and an h-index of 28. She has participated in more than 30 research projects and is the Chair of the ESCMID Respiratory Viruses Study Group (ESGREV) Executive Committee.

Since 2015, she has been teaching in undergraduate and postgraduate medical school programs and is active as a reviewer and editor for international peer reviewed journals. Her clinical approach is characterized by scientific rigor, consistency, and a patient-centered focus.
